

Fixing Bracket

Are made of recycled plastic, special design for the easy fixing of the Exterior Owl Boxes.

This bracket has been designed for easy fixing and locating

- 1) The two triangles shown blue come pre-fixed on the back of the Owl nest box.
- 2) The triangle shown in red is fixed to the surface you wish to locate the box to.
- 3) To fix this triangle insure the smaller face is closest to the surface you wish to fix to.
- 4) Make sure there is a gap of at least 600mm (2ft) from the top of triangle to any obstacle above. This allows box to sit comfortable allowing a bird to perch on top of the box.
- 5) Make sure the bottom of the triangle is level and than fix with screws
- 6) Lift the box and locate into position as diagram shows the box should wedge neatly into position
